

# *Project Proposal*

Company Name: Knights in Furry Armor

Date: 10 October 2016

Group Members:

Ayesha Farkhundah

James Suresh

Sajeeva Seralathan

Vidurshan Sribalasuhabiramam

The purpose of this proposal is to give information regarding the company and the objective of the company. Our idea for the project is an animal rescue team. We will be saving the lives left on the streets and giving them a new home as well as a family. Our idea is significant because it is helpful to the society as well as it makes a great positive impact on the future generations when they visit our site. We will be using images and videos to display pictures as well as videos of our recently rescued furry friends. Not only that but, we will be using texts and tables to give information to our audience to help them learn about the animals and adopt them at their own will. We will collect information from the user if about the type of the rescued animals they would want to adopt. We will display the number of animals adopted from each variety. As we mentioned above we will store the number of adoption per variety of animals in our database and make use of this information by displaying it on our webpage
